

## How to load wingless vinyl jumps onto cart...

1. Hang first jump stand on the **top rack** towards the right with cups **facing you**.
2. Hang the second one on the **top rack** next to the first with cups **facing you**.
3. Lay the third one on the **bottom rack** next to second one with the cups **facing to the back**.
4. Lay the fourth one on the **bottom rack** next to third one with the cups **facing to the back**.

- **Repeat** 1 thru 4 until **24 jump stands** are loaded onto the cart. **12** stands on top rack and **12** stands on bottom rack.
- **Secure** jumps to cart by hooking the **bungie** to one of the loops on the back of the cart and wrapping it around the jumps to the loop on the other side of the cart.
